Mortice locks

TESA

ASSA ABLOY

Evolution is spreading

Evolution in mortise locks has led TESA to expand its range constantly, with various backsets, finishes, distances between shafts, latch solutions, PEDs, locks for schools, hospitals, offices...

A wide range

TESA offers a wide range of mortise locks with various solutions, backsets, distances between shafts, latch solutions, PEDs, automatic projections, functions...

Finishes

A wide choice of finishes. Guaranteed by TESA, STAINLESS finishes ensure high anticorrosion resistance. Available finishes: painted, nickel, brass...

UNE-EN 12209 certification

The locks in the institutional range have been certified by the European standard that regulates architectural fittings. This ensures that requisites of durability are met, as well as resistance, security and the right functioning of locks and latches.

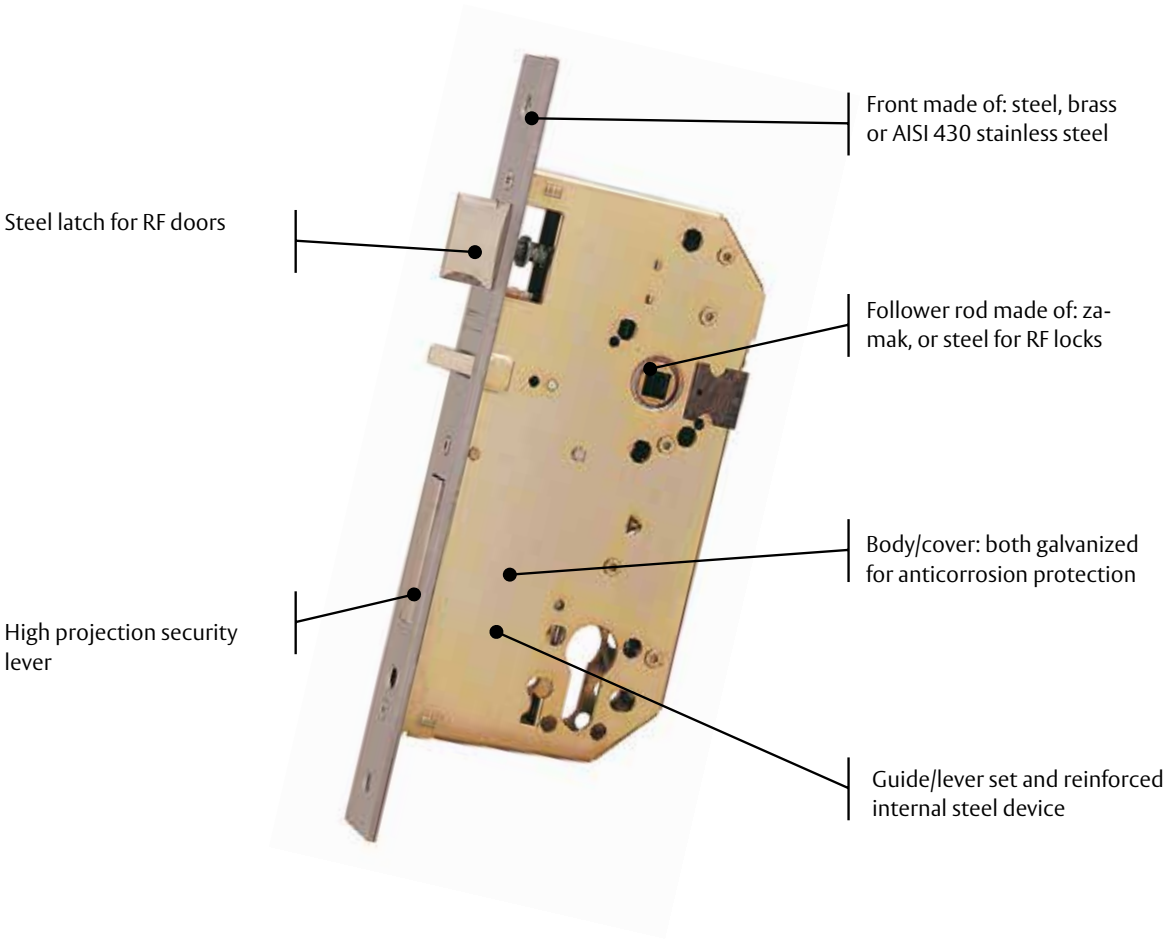
Guaranteed process

Our advanced I+D department is constantly working to improve production processes, providing the market with new, enhanced products that meet the increasingly demanding needs in the market. TESA manufactures all its products with top quality products such as stainless steel, which is employed as the standard material for fronts and strikes.

Guaranteed by tesa

Buying TESA is a quality guarantee. All our products boast the highest guarantees, such as the ISO 9001 Quality certificate, the environmentally-conscious ISO 14001 and the Occupational Hazard Prevention standard. TESA offers ecologically sustainable quality products, manufactured by highly dedicated staff.

Components of the lock



Anticard security device

When we close the door without locking it with a lever, this device prevents the latch from being pushed in from the outside with a card o a radiography.

Protective antidrill follower rod

It is used in panic exit locks with a double follower rod - this protects the door from attempts of drilling it from the outside and inserting a handle in order to open it.

Mortice locks

2000 Series

The Standard Range provides solutions for timber doors at a reasonable price with the reliability and finishing quality of higher ranges.

» Mortice lock for timber doors.
» Reversible latchbolt.
» Distance between axes: 50 mm. (2000), 47'5 mm. (2002/2004) or 47 mm (2004U).
» Backset: 30/ 40/ 50 mm.
» Follower: 8 mm. Thumbturn follower: 6 mm.
» Narrow forend (20 mm.) suitable for overlapping doors.
» 1/2 rounded forend available.
» Closed lockcase.
» Round cylinder TE-5 with 3 nickel plated steel keys (2000/ 2001).
» 1 nickel plated steel warded key (2002/ 2003).
» Packed: 15/60 units (2005) and 1/20 units (rest).

Supplies/Finish	HL
Lockcase	galvanized
Forend	steel/ brass
Forend	steel/ brass
Latchbolt	nickel plated die cast
Deadbolt	nickel plated die cast

2000 Entrance

Features
Round cylinder TE-5 with 3 nickel plated steel keys.
Operation
» Cylinder withdraws deadbolt and latchbolt.
» Lever withdraws latchbolt.

Dual latchbolt

The competitive advantage

The competitive advantage
» The new DUAL latchbolt provides a competitive advantage for the door manufacturer or the carpenter: only one lock is needed to equip both passage and bathroom/ bedroom doors.
» The use of the door (passage/ bathroom) is decided at the building works. The carpenter reduces his stock to one type of door. The handle will give the function to the door.

2004U Series

Features
» Latchbolt for timber doors.
» Suitable for both passage and bathroom/ bedroom doors.
» Reversible.
» Anti lock-out feature: when the door is open and locked automatic slam release. Door remains unlocked even if accidentally closed, if thumbturn has been operated. Prevents accidental lock-out.
» Distance between axes: 47 mm.
» Backset: 50 mm.
» Follower: 8 mm. Thumbturn follower: 6 mm.
» Narrow forend (20 mm.) suitable for overlapping doors.
» 1/2 rounded forend available.
» Closed lockcase.
» Packed: 1/60 units.

Finishes (forend/ strike)
» Brass plated steel (HL)
» Nickel plated steel (HN)
» Gold enamelled steel (AE)
» Stainless steel AISI 430 (AI)
» Black painted steel (NE).

Dual latchbolt

Advantage

» TESA adds value to these advantages offering:
a) Two distances between axes: 47 and 70 mm. (2004U/ 134U).
b) Anti-lockout feature.
c) Bolt through fixing possibility with any rose handle(134U).
d) Wide range of finishes guaranteed by TESA, the most renowned name throughout the world for its security products.

B

134U Series

Features

» Latchbolt for timber doors.
» Suitable for both passage and bathroom/ bedroom doors.
» Reversible.
» Anti lock-out feature: when the door is open and locked automatic slam release. Door remains unlocked even if accidentally closed, if thumbturn has been operated. Prevents accidental lock-out.
» Lockcase prepared for handle bolt through fixing.
» Distance between axes: 70 mm.
» Backset: 50 mm.
» Follower: 8 mm. Thumbturn follower: 6 mm.

Finishes (forend/ strike)
» Brass plated steel (HL)
» Nickel plated steel (HN)
» Gold enamelled steel (AE)
» Stainless steel AISI 430 (AI)
» Black painted steel (NE).

High range latch

134U Plus Series

Features
» Mortise lock for wooden doors.
» Distance between shafts: 70 mm.
» Backset: 50.
» Valid for both passage and deadbolt doors.
» Automatic unblocking of deadbolt: if the deadbolt is activated with an open door, this will be released when it is closed.
» Reversible latch made of AISI 304 wrought stainless steel. Silent, fire-resistant.
» Handle follower rod: 8mm. Deadbolt follower rod: 6 mm.
» 23 mm front, square or round-shaped.
» Housings conform to DN standard for double rapiers.
» Packaging in one single box.
» Certified according to the 12209 CE-EN standard.
» With strike protector.

Finishes
» Brass steel (HL)
» Nickel brass (HN)
» Glazed steel (AE)
» AISI 430 stainless steel (AI)
» Antique brass (LA)

DEC lock

2DEC6 - 2DEC8 Series

DEC
Disabled, Elderly and Children

DEC: Disabled, Elderly and Children
Specifically designed mechanism for making the access, exit and comfort easier for users with limitations:
» Handicapped, elderly and children with reduced mobility.
» Specially for swinging or sliding toilet doors.
» Geriatric hospitals, health centers, hospitals in general, nursery (school), daycare centers, etc.

Features:
» From the outside, when you push the door opens.
» From the inside, the roller blocks lifting up the handle.
» From the inside, the roller unblocks lifting down the handle.
» The rollers allows the openning to the outside and to the inside.
» In the case of sliding doors instead of a roller we apply a hook. Equivalent system as with the roller.
» Red sign means occupied and green sign means free.
» Emergency openning with screwdriver or coin.
» BRAILLE KIT OPTION: check in the "handles" chapter.
» ANTIMICROBIAL OPTION: check in the "handles" chapter.

Institutional range

2030F Series

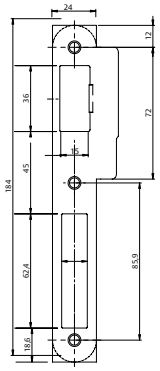
Hospitals, schools, office buildings, ... deal with intensive public traffic and rough use.
Locks included in the Commercial Range bring together reliability and functionality, and combine also with handles, panic bars, electro-magnetic devices, etc. provided by TESA.
Institutional range 2030F Series locks are certified according UNE-EN 12209 CE certificated.

Features

- Antipanic reversible lock: Panic exit function configurable in the installation.
- Sashlock for timber doors.
- Reversible latchbolt.
- Distance between axes: 85 mm.
- Backsets: 50/ 60/ 70 mm.
- Follower: 8 mm. Thumbturn follower: 6 mm.
- 1/2 rounded forend available.
- Closed lockcase.
- Euro-profile 5 pin cylinder made to DIN V 18254 with 3 nickel plated steel sawn keys. LP/ HL finish: brass finished cylinder. HN/ NE/ AI finish: nickel finished cylinder.
- Packed: 1/20 units.

ANTIPANIC REVERSIBLE

CERTIFIED ACCORDING UNE-EN 12209:2004



The reversible lock becomes non-antipanic on the side where the screw is removed.

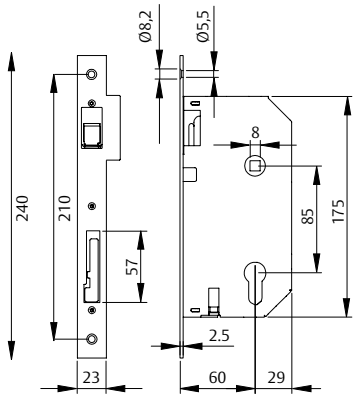
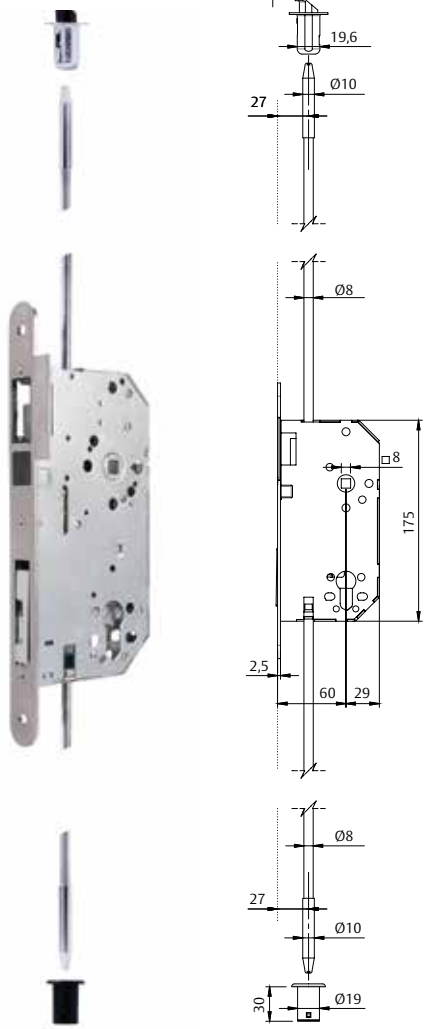
Counter lock 2032F

Features:

» Counterlock for double leaf doors, to be instaled in passive leaf.
» It can be installed with 2035T, 2037F and 2039T on the main leaf.
» CE certified according to EN-1125: 2008.
» Suitable for FR doors. EN 1634-1:2014.
» 85 mm distance between axes.
» Backset: 60mm.
» Stainless Steel made reversible ½ rounded frontplate.
» Can be operated manually or through the panic bar.
» When operating the counterlock, the 2032F actuator pushes back the main leaf lock latchbolt and retracts the top and bottom rods at the same time.
» Complete lock set consists of a central main lock, two vertical rods and a top and bottom locking point.





Product cod	Function
2032F6RAI	Central main lock
BARVE2032FCE	Vertical rods, for top and bottom locking points
RETCF32	Top relatching device

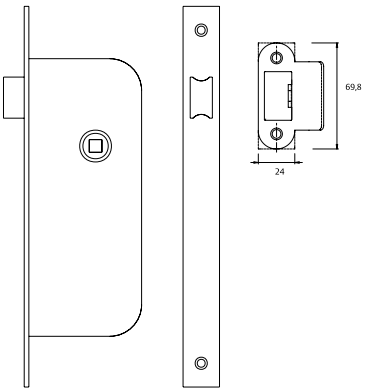
Mortice locks

2035F Series

» Application to fire proof doors (steel latchbolt and deadbolt).
» Passage doors.

Operation

» Reversible latchbolt withdraws from either side with levers or knobs.



2035F	Model	Backset	Hand	Finish

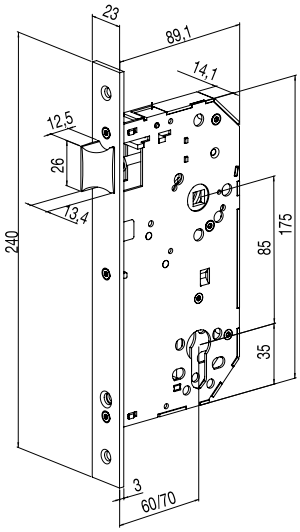
Underline: "Express 5" service.
No underline: 15 working days maximun.

2037F Series



Features:

» The cylinder activates the latchbolt and blocks the follower.
» Follower activates the latchbolt.
» Antipanic from exterior side.
» Valid for fire resistance doors.
» Distance between axes: 85 mm.
» Backset: 60/70 mm.
» Follower 8 mm.
» Round 1/2 optional.
» Steel reversible latchbolt. Reversibility is done moving the stop.
» Antipanic function is based the position of the spindle.
» Double spindle specific for 2037, 8x105 mm.
» Double spindle optional 2037, 8x125 mm.

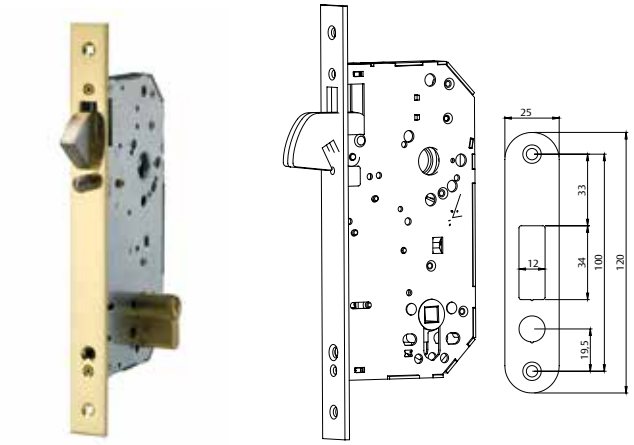
Mortice locks

2038 Series

Features:
» Backsets: 60/70 mm.
» Activable hook with cylinder.
» Same mortising as the 2030 model.

Model	Backset	Finish	Packaging
2038	60 / 70	HL	1 / 20
2038	60 / 70	AI	1 / 20

Underline: "Express 5" service.
No underline: 15 working days maximun.



2039F Series

» Application to fire proof doors (steel latchbolt and deadbolt).
» Main entrance doors. Mortice nightlatch.

Operation
» Latchbolt withdraws from inside with lever or knob or by single cylinder from outside.

2039F	Model	Latch	Backset A	Hand

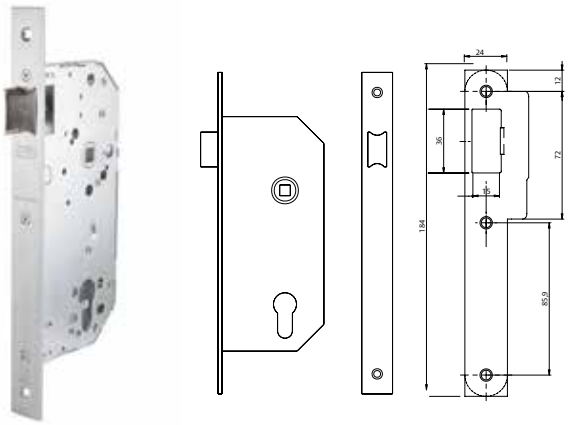
Locks supplied without cylinder have and 10% of increment in price.

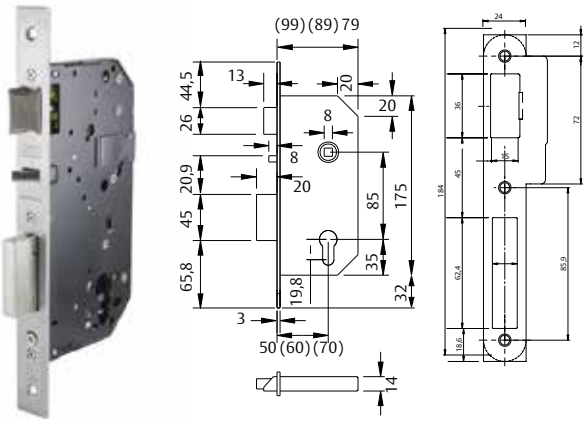


203MN Automatic Series

CERTIFIED ACCORDING UNE-EN 12209:2004

» Distance between shafts: 85 mm.
» Backsets: 60/70 mm.
» 8 mm follower rod.
» Automatic lever projection.
» Panic exit function.
» Anticard device.
» Apt for firebreak doors.

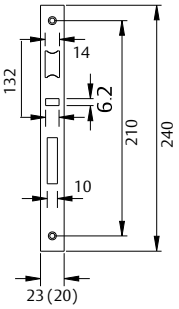
Model	Backset	Finish	Packaging
203MN	60	AI	1 / 20
203MN	70	AI	1 / 20



Classification:

3	H	8	1	0	C	2	B	H	2	0
Category of use	Durability and load on latch bolt	Door mass and closing force.	Suitability for use on fire/ smoke doors.	Safety	Corrosion resistance and temperature.	Security and drill resistance.	Fields of application for doors.	Type of key manoeuvre and blocking.	Type of manoeuvre in t he follower rod	Requirements for key identification.

» Extra security:
- The lever is not projected until the latch is lodged in the frame.
- The lever has double interlocking, halfway and at the end of the trajectory.



Mortice locks

2030FZ Serie

Mortise lock for wooden doors., suitable for use in fire doors.

Features

» Conforms to the UNE-EN 12209 standard.
» Reversible steel latch.
» Distance between shafts: 85 mm
» Backsets: 45/50 mm.
» Follower: 8 mm.
» Reversible.
» Front and Strike AISI 304 stainless.
» Cylinder TE5 35x35 mm nickel-plated.
» Packaging in boxes of 1/20 units.

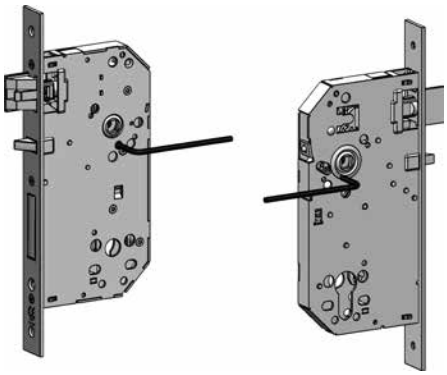
2UB0F Serie

ANTIPANIC REVERSIBLE

CERTIFIED ACCORDING UNE-EN 12209:2004

Features

- Antipanic reversible lock: Panic exit function configurable in the installation.
- Mortise lock for wooden doors.
- Conforms to the UNE-EN 12209 standard. EC-certified.
- Reversible, silent latch in sintered steel. Profile of the latch: 17 mm (extra-security).
- Distance between shafts: 85 mm.
- Backsets: 60/70 mm.
- By default, they include a panic exit function allowing for permanent free passage from the inside. When standard follower retention is ordered, an external protection device for the follower is installed in order to prevent the drilling attack. When split follower reference is ordered, the lock is antipanic for both sides. Removin a screw you can choose the hand of the lock.
- Steel follower rod: 8mm. Deadbolt follower rod: 6 mm
- Optional round shape 1/2.
- Closed body, which prevents shavings from entering at the time of installation.
- TE-5 Europrofile cylinder with nickel steel keys. LP and HL finishes: cylinder's finish in brass. HN, AI and NE finishes: cylinder's finish in nickel.
- Packaging in boxes of 1/20 units.



The reversible lock becomes non-antipanic on the side where the screw is removed.

2UB0F Series

In recent years we have witnessed a great development of the European standards in the field of architectural fittings. Gradually all members of the CEN (Spain among them) have confirmed the various European standards (EN) concerning architectural buildings – these regulations have the category of National Standards, and they must be compulsorily observed by all member countries.

As the leading national manufacturer, TESA has developed a range of fittings targeting specifiers (architects, builders) with an eye on every specific standard: locks, cylinders, door closers, panic exit devices, etc.
The locks in the 2UB0F series have been tested according to the UNE-EN 12209 standard, successfully passing every test.
According to the initial sample tests, the lock has been classified as follows:

3	S	8	1	0	F	3	B	C	2	0

1. Category of use
Grade 3 for public use, where users are not likely to be very careful and the risks of misuse are much higher.

2. Durability
200,000 test cycles and a 50 N load over the latch.

3. Mass of the door and closing strength
Grade 3 for those doors whose mass is above 200 kg. Closing strength: 50 N.

4. Compatibility of use with firebreak doors
Suitable for use in firebreak doors and/or smoke stop seals.

5. Safety
No requirements.

6. Anticorrosion and temperature resistance
High anticorrosion resistance. Temperature requisites: between –20ºC and +80ºC.

7. Security of goods and antidrill resistance
Medium security.

8. Fields of application for doors
Mortise and side hung door.

9. Type of key manoeuvre and blocking
Various.

10. Type of manoeuvre in the follower rod
Various.

11. Requirements for key identification
No requirements.
